

# Volte January 2014 Release Notes

Build 4918 on CMS released Wednesday 1.15.2014

## Updates in this Release

We start the year off with a major update to the Dashboard. The new default dashboard contains several new and updated widgets. The [Activity] widget replaces [Message and Notifications]. The [Recent File Activity] has been updated with a new look. There are also four new widgets: [Help], [Errors], [Site 24x7], and [Publishing Monitor].

## Summary

### Default Dashboard Update (CMS-3263)

The default dashboard now contains new or updated versions of the [Activity], [Recent File Activity], [Help], [Errors], [Site 24x7], and [Publishing Monitor] widgets.

### User List Report (CMS-3159)

There is a new report that displays or downloads a list of users. You can find it by navigating in the CMS

### Image Editor (CMS-2809)

This feature allows users to perform light image editing in the CMS such as crop, resize, orient, and change to brightness [beta version].

### System Audit Report Updates (CMS-2906/CMS-3903)

This report now contains the failed login attempts. The report also captures the server IP address instead of

to **Settings --> Users/Groups --> Users.**

### **IE 11 Updates (CMS-3194/CMS-3289)**

IE11 cause some screen stability issues in Volte. These have been repaired in this version. There are some remaining issues in Classic that will be addressed in the next release.

### **Expand Panels (CMS-3102)**

Users now have the ability to Expand All panels when editing an asset. The [Expand All] button can be found in the upper right after a template asset is opened for editing.

### **Ephox 9.0.0.120 Information**

When updating to Ephox 9, the Ephox cache needs to be cleared in order to see all the available editing icons. In addition, there is a known issue where the CMS icon is missing when trying to use [Insert Image] in the WYSIWYG.

the user IP address.

### **Characters stripped from paths in Volte (CMS-2985)**

Fixed an issue in Volte for calculating published URLs for non-templated binary assets. Some special characters were being removed from the path, which caused errors in the path/URL calculations.

### **User Creation Group Requirement (CMS-3293)**

A requirement has been added where a new user must be part of at least one group upon creation.

### **Continued Site Performance Improvements**

*Additional efforts were spent optimizing the speed of the application as it relates to the general navigation and specifically on the [Content] & [Dashboard] pages.*

## **Other Updates to the Application**

1. *Fixed an issue where the code path was not properly reading the FTP proxy settings (CMS-3050)*
2. *Fixed a bug in set schedule Property page where the refresh frequency controls were not displaying correctly (CMS-3072)*
3. *Fixed an issue where the Branch icon would remain after an asset was unbranched (CMS-3212)*
4. *Fixed an issue where a null error would occur when trying to create or update a user (CMS-3217)*
5. *Fixed an issue when selecting users in rapid secession (CMS-3154)*
6. *Fixed an issue where the current password box would show when creating a new user (CMS-3153)*
7. *Fixed an issue using the configurable workflow command buttons in the edit form of classic (CMS-3191)*
8. *Fixed an issue occurring when trying to download an image over 10MB from the CMS (CMS-3076)*
9. *Added a notification to acknowledge new group creation (CMS-3283)*
10. *Added sorting to column headers in Asset Refresh Schedule, Groups, Workflow Preferences (CMS-3307)*
11. *Added the CMS name to the title bar (CMS-3258)*
12. *Audit reports titles match the Report banner (CMS-1113)*
13. *Fixed a memory leak issue from the Dashboard (CMS-3253)*
14. *Fixed a memory leak issue when creating lots of assets (CMS-3061)*
15. *Fixed a script error which occurred when moving the Google Widget on the Dashboard (CMS-2072)*
16. *Fixed a Silverlight error on the Dashboard (CMS-3261)*
17. *Fixed an error which would occur when trying to revert to a previous version of an asset (CMS-2776)*
18. *Fixed an issue with branched assets remaining locked after exit (CMS-3226)*
19. *Fixed an issue with carriage returns and spaces in filenames causing login issues (CMS-3237)*
20. *Removed hover affect from the Description of the Audit reports (CMS-1112)*

21. Fixed Mailto link in Classic (CMS-3015)
22. Removed the arrows from the version window (CMS-2539)
