

# Volte April 2014 Release Notes

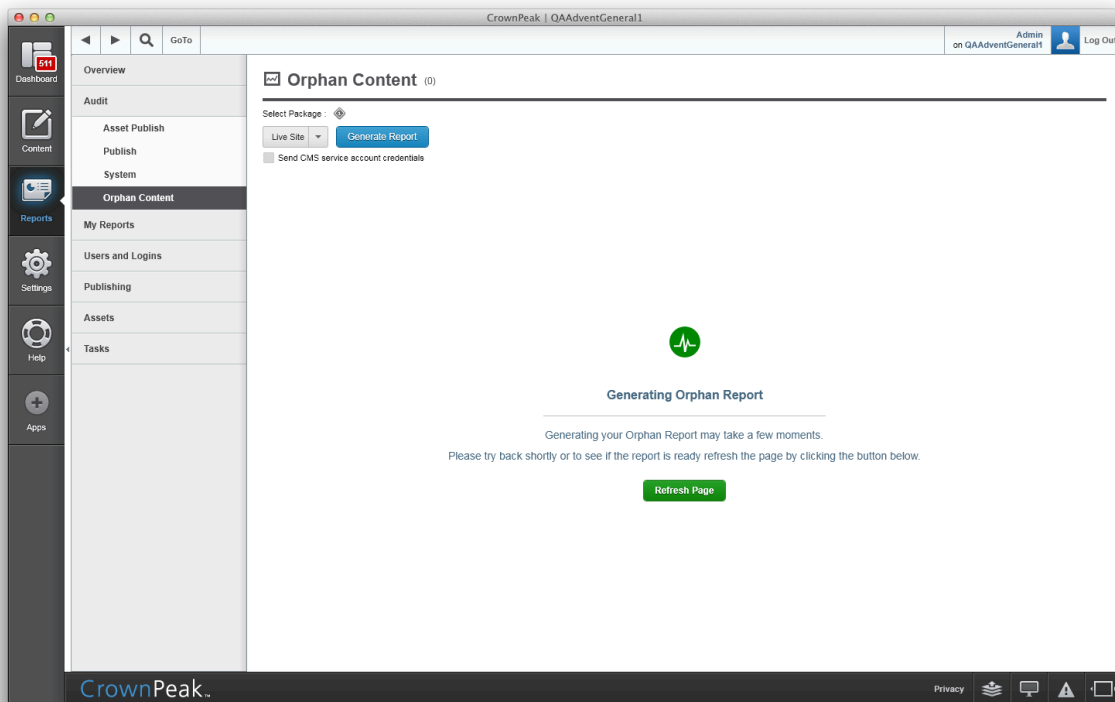

Build 51XX on CMS released Wednesday 4.16.2014

## Updates in this Release

The focus for this month is customer requests. Implementing these requests make the CMS easier to use with more tooltips and additional pop-ups to show status. Other requests include adding support for the latest browser, Java runtime environment (JRE), and operating system combinations. See the updated support matrix and the end of this announcement for details. The video of the month is the updated Orphan Content Report.

See the Orphan Content Report demonstration video at:

<http://connect.crownpeak.com/products>

## Summary

### ☰ Orphan Content Report UI Update (CMS-3867)

The Orphan Content Report user interface has been updated to make report generation more intuitive. Look for this report by navigating to **[Reports][Audit][Orphan Content]**. Note: There are required privileges in the CMS to run and view this report. **Contact support for the details.**

### ☰ Orphan Content Report Updates (CMS-3907)

The Orphan Content Report has been updated to locate and crawl additional file types such as JavaScript (\*.js) and cascading style sheets (\*.css). To run the report **select a [Package]** and press the **[Generate Report]** button. **Watch the video for more details.**

### ☰ Dependency Depth (CMS-3866)

During publishing all requested files and other related (a.k.a. dependent) files are placed in a queue for processing. This process has been updated to improve efficiency.

### ☰ Folder Workflow Warning (CMS-3728)

A warning message has been added when adding a workflow to a folder. A folder workflow does not affect the individual assets within the folder. The assets must have their own workflow in order to move through the publishing process.

### ☰ Context Menu on Parent Folder (CMS-3758)

The Content Menu in the **[FileView]** has been updated to reduce confusion. The set of the allowable actions has been reduced when selecting a folder.

### ☰ Administer User Group (CMS-2356)

A new user group privilege has been added to the CMS. The members of this group can see all users, even when not in the group. This enables administrators to manage users and groups while limiting access to other parts of the CMS.

### ☰ Folder Delete Dialog (CMS-3746)

The Delete dialog message has been updated to include the icon of the asset type being deleted. This way there should be no misunderstanding on what asset is being deleted such as folders, files, or images.

### ☰ Full Pathname on Linked Assets (CMS-3863)

Tooltips have been added to show the full path of assets when hovering over the label column on the Dependency and Linked Asset screens. Look for this feature by navigating to **[Content][Your Asset][Accordion][Linked Assets][Assets Used]**.

## Other Updates to the Application

1. DAM - Added filter capabilities to the Picker view (CMS-2394)
2. DAM - Reset the image when reopening the image picker window (CMS-3804)
3. DAM – Updated the CMS so thumbnails will not be created for assets which do not have an Output or Preview template (CMS-3336)
4. Collections - Disabled the right hand shaded shortcuts to Preview/Edit/Edit Form (CMS-3800)
5. Collections - Reset the picker window to ListView when moving from a Collection (CMS-3805)
6. Collections - Reset the picker window to ListView to an explicitly set folder (CMS-3816)
7. Collections - Fixed an issue with the Delete Collection option when inside the Collection (CMS-3841)
8. Fixed an issue with revert not working correctly if the filename has a leading/trailing space (CMS-3875)
9. Fixed an issue which occurred when trying to switch folders viewed in Classic (CMS-3790)
10. Fixed an issue where the dialog box not responding while using a VB template (CMS-3797)
11. Fixed an issue where the search icon was unusable within a VB template (CMS-3789)
12. Fixed an issue where the assets were deselected while using the scrollbar in FileView (CMS-3740)
13. Updated Classic to show the Clone Special panel only when a Folder is selected (CMS-3605)
14. Updated the Volte Workflow task report to match Classic (CMS-3452)
15. Fixed an issue where the correct folder was not being loaded when selecting an asset in the Open Container Report (CMS-3842)
16. Added CopyAction property (CopyActionType enum) to the copy.aspx context (CMS-3853)
17. Updated the download action to produce the same results as the View Output option (CMS-3591)
18. Fixed an issue where links showed the wrong location after a file was Branched and Moved (CMS-3211)

19. Fixed an issue where a video inserted into a WYSIWYG would overlap the text (CMS-3760)
20. Fixed an issue which occurred when duplicating a panel within an asset (CMS-3751)
21. Removed the Help option from the Workflow update in Volte (CMS-3831)
22. Fixed an issue when attempting to create a C# Custom Class library in Classic (CMS-3830)
23. Fixed an issue where the user would be taken to the ListView rather than PageView when selecting a file via a link in the Preview (CMS-3673)
24. Fixed a SilverLight error which occurred when attempting to access the Customer Help documents (CMS-3684)
25. Updated the thumbnail image when reverting to a previous version of an image (CMS-3817)
26. Added a separate Edit Template - Access Control Language (ACL) privilege (CMS-3884)
27. Adjusted the location of the General Properties prompt on the new workflow screen (CMS-3353)
28. Fixed an issue where an error would occur when moving the scrollbar (CMS-3870)
29. Fixed an issue that prevented the thumbnail generation process for some assets (CMS-3741)
30. Modified the API's filter handling when using large sets of data (CMS-3836)
31. Updated the server unavailable error handling when access is not available (CMS-3811)
32. Added a warning when adding a Workflow to a Folder (CMS-3728)
33. Added measures to detect poorly performing templates (CMS-2901)
34. Limited the users set of actions which affect the Parent Folder when no assets are selected in FileView (CMS-3758)
35. Updated the confirmation message when deleting a single asset (CMS-3746)

## Volte Support Matrix

The following is the latest browser, Java runtime environment (JRE), and operating system support matrix. The previous version was updated in November of last year. The updates are highlighted in *blue bold italics*.

Operating System	Windows 7	Windows 8.1	Mac OS X 10.7	Mac OS X 10.8	<i>Mac OS X 10.9.2</i>
Requires Silverlight 5.0.6 - 5.1.30214.0					
Browser					
Microsoft Internet Explorer (IE)					
IE 8	x				
IE 9	x				
IE 10	x	x			
IE 11	x	x			
Safari					
6.0.5			x	x	
<i>7.0.2</i>					<i>x</i>
Editors					
TinyMCE					
3.5.7	x	x	x	x	<i>x</i>
<i>4.0.16</i>	<i>x</i>	<i>x</i>	<i>x</i>	<i>x</i>	<i>x</i>
Ephox EditLive!					
<i>9.0.0.120</i>	<i>x</i>	<i>x</i>			
Requires: Java Runtime Environment (JRE)	<i>1.7.0_51</i>	<i>1.7.0_51</i>			

### *End-of-support for Microsoft Windows XP*

*CrownPeak has ended support for Microsoft Windows XP. We will no longer test or provide fixes or technical support for Windows XP. See the Microsoft end of support statement for more details:*
